President's Message

Professor Corrado Paganelli
University of Brescia, Italy

Dear ADEE Colleagues,

Welcome to this the third edition of the ADEE newsletter of 2016.

In this edition we want to bring you up to date on many exciting projects and changes which are under way.

Our Secretary General Prof Cristina Manzanera starts by taking the opportunity to update us on the activities and decisions taken at the Association's [General Assembly](#) in Barcelona, and guides us through the recent changes to our constitution.

We are pleased to welcome Prof Stéphanie Tubert-Jeannin as our President elect. While in Barcelona we took the opportunity to speak with Stéphanie and you will find a biography, details of her vast experience and some of her views on education on [page 4](#).

Prof Walmsley speaks to us about the current work being undertaken by the Association in the reviewing of our taskforce document on [page 5](#).

You can read about my visits to SEAADE, IADR-PER and the EDSA

summer school in Dubrovnik on [pages 6 and 7](#).

We draw your attention to the evolving programme for the joint ADEE/ADEA meeting in London May 2017 which focuses on the theme 'Shaping the future of dental education' on [Page 8](#). We sincerely hope many of you will join us for this exciting and we hope very productive new addition to the meeting calendar.

On [page 9](#) you can read about the ADEE 2016/2017 Scholarship fund and how ADEE members can apply for funding focused on the advancement and research of dental education.

Prof Rui Amaral Mendes updates us on our first joint workshop with AMEE and discusses future collaboration with AMEE on [page 10](#).

Finally on [page 11](#) we share with you some offers and collaborative work we have been engaged in with our Platinum Partners during 2016.

I hope you enjoy this update and we will be in contact again towards the end of the year. Until then have a productive and safe term.

Report on ADEE General Assembly 2016

*Prof Dr Mª Cristina Manzanares
ADEE Secretary General*

Dear Friends, now that we have all settled back into the new term I would like to take a few moments to update you on our Associations recent General Assembly which was held in the University of Barcelona on Friday 26th August 2016 and also on some activity around the revitalisation of our annual meeting format.

General Assembly: The ADEE General assembly approved a number of key decisions which will come into force on 1st January 2017.

New Constitution: ADEE membership unanimously approved a number of changes to our constitution which will come into effect with the beginning of 2017. I outline below these key changes and their implications.

- 1. Introduction of Trustees:** In order to comply with Irish Charities regulations as set down in the [Charities Act 2009](#), ADEE will now have 3 individuals as designated Trustees of the association, two of which must be resident in Ireland. The role of the Trustees is to ensure the Association is managed and operated in compliance with Irish legislation and that ADEE funds are being managed and accounted for appropriately. Trustees can not be in receipt of payment from the association for discharging their role. I am pleased to advise that Professor Petra Hahn ADEE Treasurer, Prof Derry Shanley and Ms Majella Giles have been appointed to serve as Trustees for the period 1st January 2017 to 31st December 2019.
- 2. Membership of ADEE:** From the 1st January 2017 Universities, Dental Schools, National dental educational bodies (e.g. programmes for auxiliary personnel), National Dental Associations and European Associations or specialist societies specifically concerned with or related to dental education, which are constituted within a country as designated by the World Health Organisation European Region will now be entitled to direct membership. The current WHO listing of countries within the European Region can be found [here](#).
- 3. Membership of ADEE Executive Committee:** From the membership year 2017 Membership of the ADEE Executive Committee is open to individuals from ADEE member institution from within the European Economic Area.

ADEE Executive Committee 2017: From 1st January 2017 the ADEE Executive Committee will be composed of Professor Corrado Paganelli (President), Professor Stéphanie Tubert-Jeannin (President elect), Professor Cristina Manzanares (Secretary General), Professor Petra Hahn (Treasurer), Plus committee members Professor Rui Amarel Mendes, Professor Julia Davies and Dr Ronald Gorter along with co-opted members in relation to hosting of meetings Professor Vutaute Peculiene Vilnius 2017 and Dr Barry Quinn London 2017. The Executive would like to sincerely thank Professor Damien Walmsley who will end his term on the Executive on 31st December 2016, for his dedication and enthusiasm while being a member of the Executive. While Damien will not be on the Executive in 2017 he will continue to lead the work on revision of the Taskforce documents during 2017 and for this we are most grateful.

ADEE President Elect 2017: Professor Stéphanie Tubert-Jeannin was appointed President elect of the

association and you can read a brief biography on Stéphanie on page [4](#). The executive looks forward to working with Stéphanie in the coming years.

Upcoming ADEE Annual Meetings: The Executive is pleased to announce the confirmed venues for upcoming ADEE annual scientific meetings. In 2017 the meeting will be hosted by the Dental Faculty of the University of Vilnius in Lithuania, 2018 will see us travel to the University of Oslo in Norway and in 2019 the Annual Meeting will be held in Charite University Mitte Campus in Berlin Germany. A core element of our annual scientific meeting is being able to visit our member's institutions and experience the diverse cultures of Europe.

The ADEE executive now welcomes proposals from interested members for the hosting of ADEE 2020 for information please visit the webpages.

Revitalisation of ADEE annual meeting format: The Executive is committed to updating the annual scientific meeting format and strives where possible to enact the suggestions received via the annual meeting questionnaire. This work commenced a number of years ago and we continued to deliver changes in Barcelona. In particular we introduced a more environmentally friendly meeting concept with electronic abstract booklet and removal of the Saturday elements in the programme, I am pleased to advise that of the many delegates who completed the meeting feedback survey over 90% of delegates welcomed and appreciated these changes. We have in the past year or so received feedback on the quality of plenary speakers and the delivery of the poster exhibition and the Executive are committed to address these two elements in the coming 2 meetings. We will pilot a new method of delivering posters in Vilnius and are in discussions with our Colleagues in Oslo regarding the programme speakers and how these are best used within ADEE. We always welcome feedback and do all within our power and budget to deliver the suggestions requested by our members.

Move towards being paperless: ADEE will continue to move towards becoming a more paperless organisation in 2016 and 2017 and as you now see you are receiving this newsletter electronically. We encourage you not only keep your own [ADEE User profile](#) up-to date but to also encourage your colleagues to do so. Remember all faculty and students of an ADEE members institution are viewed as ADEE members. Ensure you and your institution get the best value from your membership and receive the most up to date news by keeping your personal member profile up to date. If you experience log in difficulty use the [contact us](#) section of the webpages.

Taskforce Updating: At the General Assembly Prof Damien Walmsley update the delegates on the progress made in the first half of 2016 on the updating of our core taskforce document. A more detailed report on this and the next steps is provided on [page 5](#).

I hope you found this brief update on the key actions of the General Assembly useful and if you have any queries please do not hesitate to contact me directly or Denis and Judith in the office. I look forward to seeing you all in [London](#) in May for our Joint Meeting with ADEA and in the beautiful Baltic city of Vilnius next August for ADEE 2017 *'Learning together to improve oral health and quality of life.'*

Introducing ADEE President Elect Professor Stéphanie Tubert-Jeannin

*Prof Stéphanie Tubert-Jeannin
President Elect of ADEE*

Professor Stéphanie Tubert-Jeannin is Dean of the Dental Faculty, University of Auvergne (UDA) in Clermont-Ferrand (France), where she is head of the Doctorate in Dentistry program and is also member of the board of trustees of the UDA University.

ADEE was born in December 1975 in Strasbourg and the dental faculty of Clermont, one of France's 16 dental schools, has been an active participant in ADEE since 1998. This dental faculty was one of the first schools visited within the DENTED Project in 1999. Faculty have staff actively participated in ADEE and DENTED, DentedEvolves and DENTED III activities: taskforce on quality assurance, as well as being members of the executive committee of ADEE.

Stephanie considers that dental education needs to be structured and coordinated at different levels; locally or regionally in order to better match the dental workforce with oral health needs; but also nationally and at an European level with an objective of quality assurance in order to promote the acquisition of basic common competencies, intended to be effectively used in every day practice for the benefit of the oral health of the patients, particularly those who are more vulnerable.

For Stephanie, becoming a competent dentist requires a blend of in-depth pre and post graduate training. Simply learning the "tricks of the trade" by observing or working with experienced professionals is not enough. Situations that students encounter in the dental office represent learning opportunities only if they can be analysed using conceptual tools that are drawn from university-level research. Similarly, theoretical knowledge or even simulation exercises that are disconnected from clinical practice might be ineffective in professional training. Alternation between academic education and clinical experience represents a truly professional training.

Stephanie works in an Interdisciplinary UDA university research team, involved in the study of the impacts of oral diseases on nutrition as well as in the evaluation of the effects of dental treatment on masticatory function. Her research interests include various aspects of public health interventions, as the evaluation of oral health needs, the development and validation of oral health indicators, the implementation and evaluation of oral health promotion programs. She thus, has conducted many epidemiological surveys, participated in qualitative research studies and is also highly interested in Evidence Based Dentistry, particularly through systematic reviews. The integration of oral health issues within general health, by the development of the common risk factor approach is a common trait for those research activities.

She has participated in educational or research activities in France within the «French Deans' conference» and the « French college of educators in dental public health » and internationally within the International Association for Dental Research and the European Association for Dental Public Health.

Stéphanie Tubert-Jeannin will begin her one year term as President Elect on 1st January 2017 and her two year term as president of ADEE on 1st January 2018.

ADEE Taskforce updating 2016-2017

Professor Damien Walmsley

At the General Assembly in Szeged a call was issued for interested parties to participate in a working group to update the ADEE Taskforce document.

I am most appreciative and wish to sincerely thank the following individuals who offered to participate in the task force project. We gathered in Dublin on 1st and 2nd July to commence the updating process: Prof Cristina Manzanaras (Spain);

Dr Jacinta Mc Loughlin (Ireland); Dr James Field (UK); Dr Jon Cowpe (Wales); Dr Susanne Gerhardt-Szep (Germany); Dr Eilis DeLap (Ireland); Dr Argyro Kavadella (Greece) and Prof Julia Davis (Sweden).

This initial two day workshop proved very productive and insightful and has resulted in the following plan for the updating of the taskforce documents:

- Each Domain will follow the previous approach and have Major and Minor Competence
- Competences will be followed by Learning outcomes, Methods of teaching, Methods of Assessment
- These in turn will be followed by examples of and discussions on quality assurance implications.
- The evolving title of the new piece of work is: **Undergraduate Dental Education: A European Perspective.**

Over the coming months the working group hope to be in a position to issue a working document for consultation to ADEE members, sister associations, and other interested parties.

It is expected the final updated version of the document will be presented to the ADEE general assembly for acceptance at its meeting in Vilnius on 25th August 2017.

Please monitor the ADEE news feed for further updates and an invitation to consultation in due course.

You can download the current Taskforce documents from the [taskforce](#) section of the website.

EDSA Summer School

Just before our trip to ADEE in Barcelona I had the pleasure of attending the European Dental Students Association Summer camp which was held in Dubrovnik, Croatia.

This now annual event brings together dental students from throughout Europe together in the beautiful and historic city of Dubrovnik. The summer camp is co-ordinated by EDSA and led by its President Luka Banjšak and a local organising team with great support from Professor Hrvoje Brkic Dean at the University of Zagreb and his dedicated team.

The meeting offers students the opportunity to learn core dental topics and techniques in a friendly and comfortable setting in an interactive and collegial manner. It also offers them the opportunity to explore and experience the beauty, history and nightlife of Dubrovnik.

*Corrado Paganelli ADEE and
Hrvoje Brkic Dean University of
Zagreb*

Update your ADEE.org user profile

Many individuals within ADEE members school and institutions do not realise that once the Institution is a member of ADEE then all staff and students can avail of member services, member meeting delegate rates and actively participate in ADEE activities. Please do encourage all your staff to [register](#) with ADEE.org and to create a user profile. This will help us help you get the most out of your ADEE membership. If you are registering for the first time select option 3 and input your institution.

SEAADE 2016

As ADEE President I have the great privilege of representing ADEE membership at many of our sister organisations events and meetings. On September 8th and 9th I had the honour of attending and presenting to the **South East Asian Association of Dental Education (SEAADE)** in Ho Chi Minh City, Vietnam. This Years theme for SEAADE meeting was "Dental Education in Asia: One Community, One Vision".

President Elect of SEAADE Allen Ming-Lun Hsu (Taiwan), President of ADEE Corrado Paganelli and Immediate Past President of SEAADE Arturo P. de Leon (Philippines)

I was provided with a platform to share what ADEE has learnt from our over 40 years of fostering convergence and promoting excellence within dental education throughout Europe. Our colleagues in SEAADE face many of the challenges we have in the past and were keen to learn from ADEE and other sister associations. Others who provided discussion and insight included Prof. Patrick J. Ferrillo (USA) and Assoc. Prof. Michael Botelho (Hong Kong), both of whom are well known to ADEE membership.

In recent years SEAADE has become a regular attendee at ADEE meetings and the ADEE Executive look forward to growing and evolving our collaborations into the years ahead.

IADR-PER 2016

Jukka Meurman President IADR and Corrado Paganelli

On September 20th to 22nd I was able to join colleagues at the 8th International Association for Dental Research/Pan European Regional Congress (IADR/PER) held in Jerusalem, Israel. As always the biannual IADR-PER congress drew large numbers and offered a diverse and interesting programme of events. While in Jerusalem I had the opportunity to speak with representative of the IADR/PER board about possible collaboration between ADEE and IADR in the coming years. In particular both Gottfried Schmalz and Jukka Meurman IADR-PER President indicated a strong willingness to collaborate. We will further explore opportunities in the coming months.

I would like to sincerely thank our colleagues in IADR-PER for their hospitality and inclusiveness.

ADEE Member Service

We remind you that we now offer ADEE members the opportunity to advertise for free on ADEE.org any academic and other dental school related positions they may have available. Since we started this service over 10 positions have been advertised ranging from clinical lecturers to Dean. Ensure you book mark the [link](#) to keep informed of future exciting opportunities.

Shaping the Future of Dental Education London May 2017

Members will by now be aware of our upcoming Joint meeting with ADEA 'Shaping the future of dental education' to be held on May 8th and 9th at King's College London. We wanted to take this opportunity to speak with you about the evolving [programme](#) and to give you details of key dates and milestones.

Our two day meeting will commence with a welcome reception at the Governors Hall of St Thomas's Hospital on the Sunday evening

kindly supported by our partners in Two Ten Health Salud. This will provide us with an opportunity to settle into our London setting and reinforce our transatlantic relationships in a relaxed atmosphere.

The following two days features a blend of [plenary](#) sessions and highly interactive workshops focusing on the four sub themes of our meeting. To explore the contents of the workshops click on the links below.

- [Global Networking](#): the how and why for dental educators
- [Inter-professional Education](#): an imperative for dental education
- The impact of new [technological and scientific discoveries](#) on traditional dental education
- [Assessment](#) in a global context

A call for poster submissions has been issued with a closing date of Friday 28th October. Online registration will open later in 2016. Places will be limited to a maximum of 300 delegates and when booking you will be asked to declare your first and second choice workshop. We will endeavour to accommodate first preferences where possible.

As there will be some minor preparation work involved we would ask that when selecting your preferred workshop to please do bear this work commitment in mind. Also if ADEE member schools wish to send multiple delegates we recommend you distribute them among the workshop themes.

ADEE Scholarship Programme 2016/17

The ADEE Executive is pleased to announce the continuation of the both the ADEE and Futudent [scholarship programmes](#) for the 2016/2017 academic terms.

The ADEE 40th Anniversary Scholarship is aimed at member schools that currently promoted best practice in dental education through focused projects or by supporting individuals participating in Master and Doctorate programmes in dental education.

Since 2015 ADEE has distributed a fund of €20,000 among its member schools to promote the advancement of dental

education. You can read about previous recipients [here](#).

For 2016-2017 the ADEE Executive has decided to evolve the ADEE Scholarship programme to not only place emphasis on individual faculty who are taking Masters of Doctorate level degree programmes focussing on Dental Education, but to also recognise the efforts of our Member Schools who are enabling and promoting a higher standard of dental education within their faculty.

€10,000 is again being ring-fenced for 2016-2017, this year to be distributed among projects put forward by an ADEE member school who can demonstrate a commitment to the research and advancement of dental education.

Projects may be institutional (development and implementation of new teaching methodologies) or of an individual nature (e.g. thesis-related).

Details of the 2017 application process and application forms can be downloaded from the dedicated [scholarship](#) pages on the ADEE website.

The closing date for 2017 application process is 17:00 UTC on 31st October 2017.

Applications received after this time will not be included in the evaluation process under any circumstances.

Applications and all supporting documentation must be received by email to scholarship@adee.org

Collaborative Activities with AMEE

Prof Rui Amaral Mendes

In August, taking advantage of having our annual meetings in the same city - the beautiful Barcelona - ADEE and its medical counterpart, AMEE (the Association for Medical Education in Europe), convened efforts to hold a joint scientific and business meeting under the topic of: "The crossroad between Dentistry and Medicine". More than a mere morning workshop's theme, this is a major trend worldwide and should be regarded as one of the major challenges pending upon two of the major stakeholders as far as Healthcare provision is concerned.

According to the World Health Organization, Interprofessional Education (IPE) is a necessary step in planning a "collaborative practice-ready" health workforce that is better prepared to respond to local and global health needs. A similar opinion is shared by our American colleagues from ADEA. Still, the important thing is how we, educators, can use a potentially good idea and put in to good use, ensuring that our students get the best possible training, in line with the most recent FDI definition of oral health, as an "integral part of general health and well-being".

Hence, being, as we are, committed to the paradigm of Interprofessional Education and Learning and Interprofessional Collaborative Practice (IPCP), we believe that it is imperative to strengthen the link between ADEE and AMEE. In addition to this evolving educational paradigm, one must also consider the prospects of a partnership that makes the best out of each other's know-how. AMEE's profound commitment to the topic of Social Accountability and ADEE long time experience and involvement on the topic of Simulation as a training tool and how that can be translated to a clinical training setting, are clearly two areas in which we may envision a fruitful exchange of experiences, ultimately enhancing both of our educational approaches and how they will affect Society.

In addition, ADEE's and AMEE's longtime commitment and development of programs aimed to foster and acknowledge Quality makes them preferential partners and allies in the Quality Assessment and Accreditation of Medical, Dental and overall Healthcare-related Higher Education Institutions. Last but not least, one must keep in mind that the European Directive 2005/36/EC, issued by the European Parliament and by the Council, establishing the EU legal foundations for the recognition of professional qualifications, makes it even more pertinent, not to say imperative, that both ADEE and AMEE join efforts in a combined approach advocating for new European Directives calling for a competencies-based approach for the education of dentists and physicians.

Dental Educators on the Move—Exchange Platform launched

The Dental Educators on the Move Special Interest Group (DEOM for short) are pleased to announce the latest output from their SIG activity. ADEE members can now advertise and publicise faculty exchange opportunities they may have available. The aim is simply to assist you our members attract international faculty on an exchange or project basis. So if it is a guest lecturer position, part time or seasonal post that you would like to have visiting faculty on, a short term scholarship or research position that you would like to have open to visiting faculty from over seas then send us the details and we will advertise it for you to our members. Remember this is not for fulltime or long term paid faculty position (these can be advertised on our positions vacant page).

Platinum Partner Offers

Platinum Peer Review—Oral B

ADEE is pleased to announce that the following Procter and Gamble case studies offered via their educational pages on dentalcare.co.uk have been reviewed as the initial intake of Platinum Peer Review:

- Toothache
- Halitosis and bleeding gums
- Caries Risk
- Orthodontics
- Implants
- Tooth Sensitivity

dentalcare.co.uk is the premier website from Oral-B® for dental professionals and students around the world. It is specifically designed to provide education; research, news, and product information to help you – and your patients – achieve success every day. To find out more about this project visit the [ADEE-OralB Page](#).

Invitation to ADEE members to join #ColgateTalks

ADEE Members are invited to join [#ColgateTalks](#) - an innovative online conference to discuss the dental healthcare of tomorrow.

[#ColgateTalks](#) embraces the increasing importance of patient centric care in order to help patients achieve better outcomes and contribute to their overall health. Topics for discussion include effective disease prevention for the healthy patient, establishing the needs of periodontal patients, managing caries to prevent cavities and improving the patient's quality of life by controlling dentine hypersensitivity. The day concludes with a live round-table discussion named Prevention as an advantage for your patient and your office, shedding light on how a preventative approach can be viable in the dental office.

[#ColgateTalks](#): Empower Your Patients - A European Perspective for the 21st Century
Saturday, 22 October, 2016. [REGISTER NOW](#): Free admission.

Play a key role in the prevention and diagnosis of osteonecrosis of the jaw (ONJ)

We have received very positive feedback on the Platinum Peer review project with our Partners [AMGEN](#). The project which now has its own dedicated webpage on ADEE.org allows dentists and dental teachers to download information leaflets on the role of the dentist in the prevention and diagnosis of osteonecrosis of the jaw (ONJ).

ONJ is a rare complication that can be associated with the use of bone-protecting (antiresorptive) agents that are used for patients with cancer and bone metastases. Over the coming weeks we will be uploading additional languages and video presentations providing more information and content. Ensure you book mark the [link](#).
